

Reader Demo

A Sample Book

This short book is served by the portal itself, so the new reader can be tried without a backend. It has ten pages and three chapters.

Open the contents panel (the menu button) to jump between chapters. The reader remembers the page you stop on.

Chapter 1: Turning pages

Use the arrow keys, Page Up and Page Down, or the buttons below.

Type a page number in the box, or drag the slider.

On a phone, tap the left or right edge of the page, or swipe.

Turning pages, continued

The bar at the bottom shows how much of the book you have read and a rough estimate of the time left.

Tap the middle of the page on a phone to show or hide the bars.

Chapter 2: Finding things

Press Ctrl+F, or use the search button, to look for a word.

Results list every page where the word appears.

Try searching for the word bookmark.

Bookmarks

Open the Bookmarks tab and press the button to bookmark this page.

Bookmarks are saved for your account and listed by page.

Another bookmark page

Bookmark a few pages, close the reader and open the book again.
Your bookmarks and your page are still there.

Chapter 3: Comfort

Use the plus and minus buttons to zoom, or press Fit width to switch between fitting the width and the whole page.

On a phone, pinch the page to zoom.

Dark page

The half-moon button switches to a dark page for reading at night.
Your choice is saved to your profile, like your zoom level.

Full screen

The full screen button hides the browser around the reader.

Pressing Esc leaves full screen or closes the side panel;
it never closes the book.

The end

That is all. Press the back arrow to return to the book,
or the cross to close this tab.
